Full Leg \$230.00

**Chest- Partial
\$130.00**

Full Back \$180.00

How does IPL hair removal work?

The IPL (Intense Pulsed Light Therapy) hair removal procedure produces a high intensity flash of filtered light from the applicator head, which has been placed in contact with the skin. The energy from the light source is absorbed by the pigment melanin, which is the chromophore, which gives hair its color. The hair rapidly absorbs this filtered light and transfers it to the surrounding cells that in turn are converted into heat raising them to a temperature of 70 degree Centigrade or more. The heating denatures the cells making them incapable of producing further hair growth.

IPL Pricing

We will match or beat any other (written) offer price.

A \$50.00 consultation fee is redeemable after first treatment.

Please let us know if you're interested in tattoo removal or anything else not listed here.
